POSITION: TIG Process Piping Welders and Fitters incl Entry Level

COMPANY DESCRIPTION:

Wright Process Systems is an Industrial Engineering, Installation, Sales, Service, and General Construction firm in the Food Process Industry, serving California and the Western US. Wright Process is a family owned, multi-discipline "turn-key" firm specializing in the Food, Dairy, Beverage, Alcoholic Beverage, and related process markets. Our goal is to continuously assist our customers with the highest possible level of technical innovation and dedicated service, driving improvement throughout their entire process.

POSITION DESCRIPTION:

Wright Process Systems is looking for field welders and fitters to join our process piping installation team.

Our field crew members are responsible for all installation and fabrication aspects of our Food Process system projects. All crew members must bring an energetic and positive attitude to work every day, with the mindset to do everything possible to assure high quality and on-time installations leading to ecstatic customers.

Field welder and fitters perform pipe fitting, TIG purge welding, piping layout, support structure layouts, related construction / installation tasks, polishing, finishing, and general fabrication.

Applicants should be experienced in sanitary stainless steel purge TIG welded process piping, polishing, and installation skills. Experience in MIG (wire-feed) and SMAW (stick) welding on stainless and carbon piping is a plus. Experience in copper pipe sweating is also a plus. WPS is also looking for entry-level helper/welders looking to learn the trade.

These positions are full time with benefits available after a successfully completed probationary period. These positions are field positions, requiring regular travel to and from jobsites. Travel and stay expenses are covered by Wright Process, including daily per-diem allowance paid to each employee, where applicable outside of working radius of our offices and/or employee home locations. Our projects are typically located in the Central Valley, Bay Area, and surrounding areas of California, and also include some project locations in the continental US.

QUALIFICATIONS:

- 1) 2 years' experience in stainless process piping installation TIG welding & fitting trade work. Entry-level candidates can have less experience in the trade, and 2 years+ work history in any field.
- 2) Knowledge of welding and fabrication elements: filler rod, wire, purge and shield gases, hand tools, power tools, material finishing, material preparation, fit-up, etc
- 3) Experience with stainless steel and carbon steel materials is required
- 4) Commitment to taking care of company and personal tools, equipment, and components
- 5) Experience with industrial maintenance tasks such as pump rebuilding, equipment leveling and aligning, valve rebuilding, etc is a plus
- 6) Thorough understanding of sanitary process installation practices
- 7) Familiarity with general construction equipment, vehicles, tools, and components
- 8) Understanding of industrial safety requirements with proven history of safe work
- 9) Must be a team-player and support all coworkers
- 10) Valid California driver's license and vehicle insurance
- 11) Must be drug free, accountable, on time, and have exemplary work ethic
